

Logo Book

Everything you need to use Reggie & the Regentify wordmark correctly — anatomy, lockups, spacing, color and applications.

VERSION 1.0

NINE PAGES

01

Meet Reggie.

Reggie is a round, friendly baby dinosaur wearing a graduation cap — the face of learning that levels up. The mark always sits inside a rounded green tile, balanced by XP-yellow spikes, feet and tassel.

1

Squircle tile

A 118px-radius rounded square in the brand green gradient — the constant container for the mark.

2

XP accents

Back-spikes, feet and cap tassel in XP Yellow — the reward color carried from the product.

3

Graduation cap

Ink-black mortarboard signals education; it anchors the silhouette and reads even at small sizes.

4

Belly & eye

Mint belly and a single oversized eye give Reggie warmth and a clear focal point.

Mark & wordmark.

The icon can stand alone, or pair with the wordmark in two approved lockups.

Always keep the relationship and spacing fixed — never re-typeset the wordmark or re-scale one part independently.

WORDMARK SET IN FREDOKA 700 · "IFY" IN XP YELLOW

Built on a grid.

The tile is a 512-unit square with a 16-unit margin and 118-unit corner radius. Reggie is centered on the optical axis; the cap and eye align to the upper third.

16

Tile margin

16 units of breathing room inside the 512 artboard keeps the squircle off every edge.

118

Corner radius

A fixed 118-unit radius — the same squircle softness used across all product surfaces.

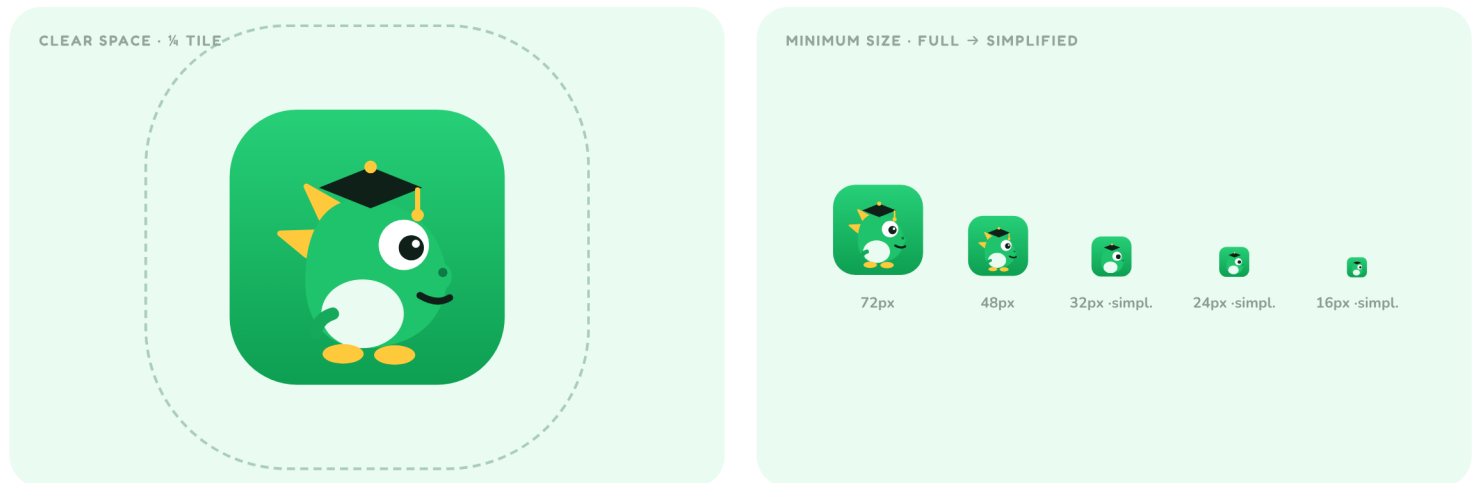

Optical centering

Reggie shifts slightly right of true center so the back-spikes don't pull the silhouette off balance.

Give it room.

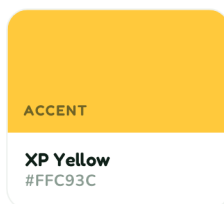

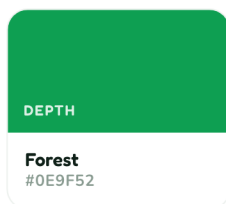

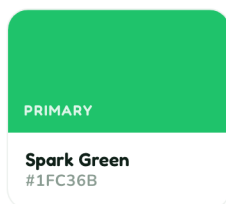

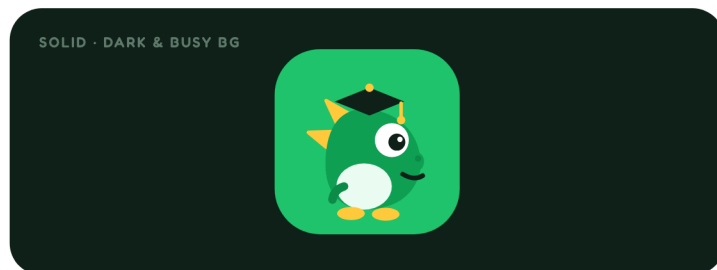

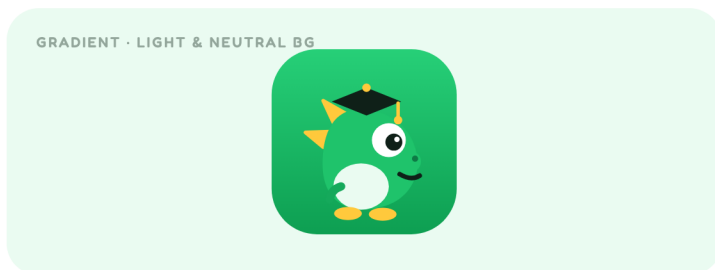

Maintain clear space of at least one-quarter of the tile width on every side. Below 32px, switch to the simplified mark so the silhouette stays crisp.

SIMPLIFIED MARK DROPS SPIKES, FEET & TASSEL – BODY, EYE, SNOUT & CAP REMAIN

Two tiles, one palette.

Use the green **gradient** tile on light and neutral surfaces. On dark or busy backgrounds, use the **solid Spark Green** tile so the squircle keeps a clean edge. The mark inside never changes proportion or color.

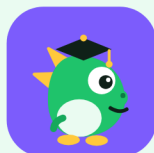

GRADIENT RUNS #27D078 → #0E9F52, TOP TO BOTTOM

Protect the mark.

The mark is a fixed asset. Don't alter its color, proportion, orientation or effects — these examples are all incorrect.

Don't stretch or distort the proportions.

Don't recolor the tile to off-brand hues.

Don't rotate or tilt the mark.

Don't add drop shadows or effects.

Don't place the tile-less mark on a busy bg.

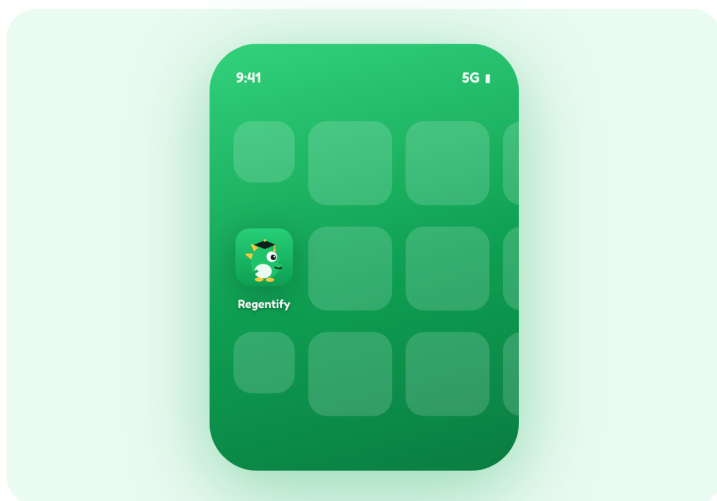

Don't desaturate or convert to mono.

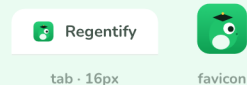

WHEN IN DOUBT, USE A SUPPLIED FILE UNCHANGED

Out in the world.

Reggie is built to thrive as an app icon, favicon and avatar — high contrast, instantly recognizable, legible at a glance on a crowded home screen.

MASK THE TILE TO A CIRCLE ONLY FOR AVATARS — NEVER CROP THE SILHOUETTE

Download & go.

Every approved file lives in `assets/logo/`. Each is hand-layered, commented, and ready for production.

`reggie-dino-icon.svg`

Primary app icon — gradient tile, full detail.

`reggie-dino-icon-dark.svg`

Solid Spark Green tile for dark surfaces.

`reggie-dino-mark.svg`

Tile-less mark, transparent background.

`reggie-dino-favicon.svg`

Simplified mark for 16–32px favicons.

Regentify

`lockup-horizontal.svg`

Icon + wordmark, side by side.

Regentify

`lockup-stacked.svg`

Icon above wordmark, centered.
